

PharmacyOne

Introducing Liberty Software's new pharmacy platform PharmacyOne: a unified solution for community pharmacies. This all-in-one platform provides features tailored for pharmacists, ensuring efficient pharmacy management.

PharmacyOne

A complete software solution for community pharmacies.

- **Connected Pharmacy Software**

Integrates with all PharmacyOne components and third-party systems.

- **Patient Engagement**

Connect with your patients via text, email, voice calls, or the Rx365 patient app and have two-way conversations all directly from within the PharmacyOne platform.

- **Easy-to-use features designed by pharmacists**

- **Support from a knowledgeable team lead by pharmacists who understand pharmacy**

CheckOut

A point-of-sale solution to manage the front end of the pharmacy.

- **Inventory Management**

Finally get a handle on your front-end inventory. Manage inventory, place electronic orders with wholesalers, print shelf barcodes, extensive and flexible reporting.

- **Capture Signatures**

Electronically capture signatures for third-party audits, pharmacist counseling, credit cards, and even custom restrictions.

- **Real-Time Pseudoephedrine Monitoring**

Monitoring and tracking for over-the-counter pseudoephedrine and restrictions for monthly limits.

- **Secure**

PCI compliant and IIAS certified for Flex and Health Savings payment processing.

Chain Management

A web-based solution for chain-store management.

- **Individual Pharmacy Dashboards**

View each pharmacy's key performance metrics today and over time.

- **Store-to-Store Management**

Transfer prescriptions and drug inventory quickly within your pharmacies. Manage employees across all stores.

- **Centralized Accounts Receivable and Third-Party Payments**

Easily track and manage your financials across all stores.

- **Centralized Reporting**

Run reports and DataViews for any individual store or all stores in real time.

Apps

Extend the power of the PharmacyOne platform with convenient apps included to help you manage your pharmacy.

- **Rx365 Mobile**

A patient app connecting your patients to your pharmacy 24/7. Ensure your pharmacy's personality shines through in every interaction while creating a seamless experience for your patients.

- **QuickStats**

Business analytics on the fly. Review your key pharmacy metrics for all pharmacy locations from anywhere.

- **Count**

Take control of your pharmacy's inventory. Keeping your inventory organized and accurate has never been easier.

- **Deliver**

Optimize deliveries, perform secure remote video pharmacist consultations, and collect signatures on the go.

LEARN MORE

Newest product or service

PharmacyOne is the pharmacy management platform helping retail pharmacies improve profitability, enhance patient care, and improve patient safety.

PharmacyOne included apps:

- **Rx365 Mobile:** A patient app connecting patients to the pharmacy 24/7.
- **QuickStats:** Pharmacy business analytics on the fly.
- **Count:** For keeping inventory organized and accurate.
- **Deliver:** Door-to-door deliveries with secure remote video pharmacists' consultations.

PharmacyOne CentralFill

Improving patient safety or outcomes

PharmacyOne ClinicalSmart Check for the clinical review and Facts and Comparisons.

Clinical SmartCheck: More meaningful clinical alerts with easy clinical documentation.

Clinical Information: Clinical information is built into workflow where you need it most.

Safety Checks: Look-alike and sound-alike alerts, black warning boxes, morphine equivalent dosing alerts, 5-point checks, and other innovative checkpoints help you create a level of patient safety rarely seen in community pharmacies.

Products and services that help pharmacies increase revenue opportunities and profitability

Immunizations and connections to third-party pharmacy billing platforms.

Profit Protection: Built-in Profit Protection and Audit warnings to help achieve optimal reimbursement potential and reduce claim submission errors.

Reporting: Query, filter, group, sort, and pivot table your data to answer complex questions and give you new insights into your business.

Insurance Management: DIR Fee Management, third-party reconciliation, and AWP Reclaim. Plus, our powerful Payment Center makes reviewing claims easy and actionable.

The strategic needs for pharmacy technology in the next three to five years

Central-fill and chain features for the multilocation independent community pharmacy owner and enhanced patient engagement tools.
