

FOR PHARMACISTS SEAMLESS COMPOUNDING PHARMACY MANAGEMENT

We understand the challenges you face in managing a compounding pharmacy. We're here to make your life easier by offering a solution that prioritizes your needs.

Company background

SiCompounding was born out of a deep understanding of the unique challenges that compounding pharmacies face. We realized the need for a comprehensive solution that not only streamlines day-to-day operations but also places a strong emphasis on the quality of patient care. We are more than just a technology company — we are your dedicated partner in the world of compounding pharmacy management. Our journey began with a vision to empower pharmacies like yours and to revolutionize the way you deliver patient care.

Newest product or service

SiCompounding Academy takes pharmacy compounding expertise to the next level with SiCompounding. Our dedicated learning platform provides in-depth training, expert insights, and step-by-step guidance to help you master the SiCompounding app and streamline your compounding workflow.

SiHub is a device designed by the Isak Computing team to connect any equipment in the pharmacy with a Serial RS232 or USB connection. This first version will drive a wireless connection with the scales supporting all existing functionality when wired. SiHub includes a battery to guarantee data transmission integrity in case of power disconnection, over-the-air updates, and expansion capabilities for future applications. SiHub is available at a competitive price.

Improving patient safety or outcomes

Your patients rely on you for their health, and we want to make your job easier. SiCompounding grants you access to patient records, medication history, and treatment plans with just a few clicks, allowing you to offer personalized care that stems from a place of empathy.

Products and services helping pharmacies increase revenue opportunities and profitability

In SiCompounding, there's no need for multiple applications — everything you require is seamlessly integrated. From intake to shipping, we've consolidated all essential features into one comprehensive solution, simplifying your workflow and elevating your pharmacy's efficiency.

We know that keeping your pharmacy stocked and organized is a constant concern. SiCompounding simplifies inventory management, ensuring you can effortlessly keep your shelves well-stocked.

At SiCompounding, we understand the pressure of accurate and timely prescribing. With our integrated e-prescribing capabilities, you'll receive electronic prescriptions and provide your patients with precisely compounded medications without the usual hassle.

The strategic needs for pharmacy technology in the next three to five years

We are looking to increase pharmacy interoperability technologies to support compounding requirements, from e-prescribing to insurance.
